SUMMARY

Flutter Developer with 4+ years of experience building and shipping production mobile apps for iOS and Android. Shipped 10+ apps, including AI-powered consumer products built on OpenAI and other LLM APIs, fitness and diet-tracking apps, and a vehicle-management platform. Strong in Clean Architecture, Bloc and Riverpod state management, subscription monetization and analytics (RevenueCat, Adjust, Mixpanel), and unit and widget testing backed by CI/CD. Used to owning features end to end, from API contract design to store release, in Agile cross-functional teams.

SKILLS

Mobile: Flutter, Dart, iOS, Android, App Store and Google Play publishing
Architecture: Clean Architecture, Modular Architecture, Bloc, Riverpod, Provider
Cloud & APIs: RESTful APIs, Firebase, AWS, Microsoft Azure, OpenAI API
Backend & DB: .NET, Python, PostgreSQL, MongoDB, Redis
Monetization: RevenueCat (subscriptions, paywalls), Adjust, Mixpanel, Firebase Analytics, FCM push notifications
Test & CI/CD: Unit Testing, Widget Testing, Code Review, GitHub Actions, Codemagic
Tools & Team: Git, GitHub, Figma, Agile/Scrum, sprint planning and estimation

EXPERIENCE

Flutter Developer — Orion Innovation, Istanbul (Remote) Apr 2025 — Oct 2026

- Designed and shipped scalable features for a vehicle-management and digital-garage app (iOS and Android) for a US client, using Bloc and Clean Architecture.
- Defined RESTful API contracts with the backend team before implementation, reducing integration rework.
- Introduced unit and widget tests for core flows and contributed to the code review standards adopted across the mobile team.

Flutter Developer — Connectinno, Remote Nov 2023 — Apr 2025

- Shipped 10 production mobile apps for agency clients, most of them AI-powered consumer apps built on OpenAI and other LLM APIs.
- Delivered apps end to end with Bloc and Provider, from technical design to App Store and Google Play release, integrating OpenAI, Firebase, AWS and Azure services.
- Implemented the monetization and analytics layer across apps: RevenueCat subscriptions and paywalls, Adjust attribution, Mixpanel and Firebase Analytics events, and FCM push notifications for retention.
- Built reusable component libraries and architecture patterns that cut setup time for new projects.

Flutter Developer — Nexoft Mobile, Ankara Jul 2022 — Nov 2023

- Owned a diet-tracking app end to end, from architecture to App Store and Google Play release, and maintained fitness and workout apps built with Provider and Bloc.
- Migrated a legacy codebase to Flutter 3 and removed deprecated dependencies.
- Integrated Firebase, Azure, AWS and OpenAI services with a .NET and PostgreSQL backend.

Software Intern (Computer Vision) — Ford Otosan, Sakarya Jun 2021 — Aug 2021

- Developed a drivable-area segmentation model (Python, PyTorch, CNNs) and a traffic-sign detection pipeline (YOLO, OpenCV) for highway scenes.

Data Annotator — Ford Otosan, Sakarya Sep 2020 — Aug 2022

- Labeled and classified image and LiDAR point-cloud road data used to train perception models for the autonomous truck project.

EDUCATION

B.Sc. Computer Engineering — Sakarya University · GPA 2.99/4.00 — September 2017 – June 2021

CERTIFICATIONS & LANGUAGES

Neural Networks and Deep Learning — Coursera (DeepLearning.AI), August 2021
Turkish — native · English — professional working proficiency
